

CIE TC 2-51

Calibration of Multi-Channel
Spectroradiometers

CIE TC2-51 Partial Draft 0.2a

Calibration, Characterization and Use of Array Spectroradiometers

- **Terms of Reference:**
- **Produce a technical report for the calibration of array spectroradiometers primarily for the determination of colorimetric and photometric quantities, including sources of error in array spectral measurements systems, evaluation of these errors, calibration methods and methods for the determination of uncertainty.**

CIE TC2-51 Partial Draft 0.2a Calibration, Characterization and Use of Array Spectroradiometers

- Jim Palmer TC2-30 Array spectroradiometer bibliography folding into this document.
 - 100 page document with old information
 - Will update with 1990 to date information
- Member list and current draft will be submitted for posting on the web reflector.
- Meeting will be scheduled before the end of this year.
